

Network Computer Service Company (NCSC)

The mission of NCSC is to provide cost-effective Information Technology (IT) products, services, and solutions to growing companies whose core business is healthcare.

Computer Networks

At NCSC, we have years of experience in the design, installation, administration, and maintenance of computer networks. We can install or upgrade your network so that it meets your business requirements, without recommending a bunch of stuff you don't need.

- Network Infrastructure Design and Installation
- Servers
- Network Printers
- Workstations
- Scanners
- Backup Solutions
- Wireless Access

On-Site Computer Support

NCSC can repair any computer hardware problem you may have. From top-end servers to ordinary workstations, we come on-site to get you back up and running as soon as possible.

- Hardware failures
- Configuration problems
- Virus Infections
- Network Infrastructure and cabling problems
- Laser Printer Maintenance and Repair
- Upgrades and Enhancements

Remote Office Networks (Wide Area Networking)

Planning to expand your Agency? NCSC can extend your network to your remote branch offices. Using Virtual Private Network (VPN) technology, we can create a secure, yet cost-effective connection that will allow you to leverage your existing IT infrastructure to the max.

Day-to-Day Operational Support

NCSC can support you with network administration tasks, so you can focus on your core business.

- Daily backups of critical data
- Helpdesk, and remote desktop support
- User accounts and passwords
- Security administration and auditing

HIPAA Compliance

The Electronic Security provisions of HIPAA will go into effect this fall. We can ensure your IT infrastructure is compliant in all areas of the regulations. We can analyze your existing network, determine areas of non-compliance, and develop a roadmap to help you achieve compliance before the regulation becomes effective.

New Technology Consulting

In the rapidly changing world of Healthcare Technology, you may feel that you need some expert, trustworthy advice. We can help you cut through the technobabble, identify the vendors and products which may give your business a real strategic advantage, and help you understand the pros and cons of each alternative – from a technical point of view.

- Point-of-Care Systems
- Payroll, HR, Marketing Systems
- Security and Network Monitoring Systems
- Application Service Providers

Internet Services

Need your own domain name? Website? Email server? Secure Instant Messaging? We can offer a cost-effective solution tailored to your needs.

Training

Whether you have individual needs, or your office requires a day-long group training session tailored for your company, we can assist with your computer/network training needs.

Custom Programming

If you've ever found yourself thinking "I wish there was a way that my computer would do this job for me" – then you may have a requirement for a custom designed software program. NCSC can provide database programming, along with other custom programming applications. Just ask us!

- Custom Reports from your database
- Custom database creation and programming
- Custom Data Interchange and bridges
